

# Youji Cho

Frontend Developer

## 👤 Profile

I'm a dedicated front-end developer with expertise in React and Vue.js. I've successfully completed multiple projects, showcasing my ability to create responsive and visually appealing web interfaces. Backed by a six-month Front-end boot camp course, I excel in collaborative environments and have actively contributed to 6 team projects as a front-end developer. I'm passionate about crafting user-centric web experiences and am eager to bring my skills to your team.

## 📁 Projects in detail

### HEART, React

December 2022 — February 2023

Healthy Exercise Around Residence Together

The web-based application that users can communicate or look for an exercise mate based on user's location

[https://github.com/codestates-seb/seb41\\_main\\_001](https://github.com/codestates-seb/seb41_main_001)
